

International Services

Internet Connectivity via Satellite

CHALLENGE • CREATE • CONNECT

Gilat Satcom offers satellite based internet connectivity and dedicated bandwidth allocation services for ISPs, Telcos and international organizations in Africa, Asia and the Middle East. Whether you need internet backbone access, backup services or affordable VSAT connections, Gilat Satcom will respond to your communication challenge with world class, effective solutions.

Overview

Internet connectivity is the cornerstone of doing business today. However, the network infrastructure does not always reach all your remote locations or guarantee high-availability and service continuity required to run a successful business.

At Gilat Satcom, we are committed to delivering the highest caliber service to our customers. Our experienced team of technical experts offer around-the-clock proactive support ensuring fast resolution of problems and delivering business continuity.

With an extensive network spanning over 10 satellites and 2 teleports across three continents, Gilat Satcom offers a reliable, high-capacity platform worldwide. Our satellite communication platform leverages segments from the leading satellite operators: Intelsat, Hellas Sat, Telesat, ABS and SES-Newskies.

BENEFITS

- Premium C-band and KU-band coverage
- High capacity links
- Dedicated bandwidth allocation and cost effective, high-contention offering
- Reliable alternative to terrestrial networks
- Global satellite platform lay-out
- Cost-effective, easy to scale & deploy
- Multiple platforms, such as iDirect, GSN etc
- 24x7 NOC services and support

For Telcos and ISPs

Backbone Access

Gilat Satcom satellite based internet backbone access enables you to bypass inadequate terrestrial alternatives. With our backbone service, you will gain a cost-effective, scalable, feature-rich internet connection in the farthest corners of the globe.

From dedicated bandwidth allocation to high-contention solutions, the Gilat Satcom Backbone Access service is flexibly designed to meet your unique requirements. Gilat Satcom is proud to be the backbone vendor of choice for leading ISPs and Telcos worldwide.

Backup Services

Gilat Satcom provides C-band satellite based Backup Services to complement your existing infrastructure. The satellite connection ensures service continuity in cases of system failure and increases your system capacity on a regular basis.

"...the Gilat Satcom Backbone Access service is flexibly designed to meet your unique requirements..."

For Private and Governmental sectors

VSAT services

Gilat Satcom VSAT service connects small and medium businesses across the globe directly to the internet backbone. Our cost-effective service is based on an off-the-shelf, easy to use broadband connectivity platform covering Africa, Asia, and the Middle East.

With our VSAT service, you can choose the communication solution that meets your business needs. We provide premium C-band or KU-band connectivity with high and flexible bandwidth rate options.

The Gilat Satcom VSAT platform enables you to offer both continuous business connectivity and value added services such as VoIP, web-browsing and chat. Our reliable satellite based, communication platform ensures uninterrupted service and a superior browsing experience for your customers.
